

I understand that you are being petitioned by telemarketers to void the Do-Not-Call listing. This option has made my life and the life of my family a lot more pleasant then it was before this list existed. I trust that this will not be another unilateral and not well conceived decsion by the FCC.

Many of the decsions made by the FCC under Mr. Powell's leadershio were certainly NOT, in my opinion in the best interest of the American public and the users of services. They were and a negative action in this matter, would continue to be, in the best interests of the providers / corporations.

A respectfully request you "leave hands off" the Do NOT Call" listing program, nationally and in particular in NJ. States have always been allowed to make rules that are different and more strict from the federal rules and this issue is no different. We in NJ want peace and some refuge from these telemarketers.

Thanks for your consideration

FW
